📑 PROFESSIONAL SUMMARY

MERN Stack Developer | Frontend Expert | Remote Work

Passionate MERN Stack Developer with 2+ years of experience building scalable web applications like Cassopia Hotel's booking platform. Skilled in React.js, Node.js, and MongoDB, with a knack for optimizing frontend performance. Led the development of 3+ remote projects deployed on GitHub, deployed in Vercel Projects improving user engagement.

🎓 EDUCATION

Wolkite University, College of Computing & Informatics   Expected Graduation: june2025

Bachelor of Science in Information System | Honors Student

Relevant Coursework: Computer Programming & Web Technology, Computer Networking and Information Security, Database & Information Management, Data Structures & Algorithms, Object-Oriented Programming, Computation Analysis & Simulation, AI & Maintenance.

⚒ SKIILLS

- ❖ **Programming Languages**: ReactJs, JavaScript, Typescript, Tailwind Css, HTML, Mongo DB, Node.js.
- ❖ **Development Environments**: VSCode, Eclipse, Vercel, Jupyter Notebook, Unity, Google Colab.
- ❖ **Tools**: SQL Pad, Git/GitHub, Linkedin, AI Integration, Firebase, Google-meet, ML Models.

🚀 PROJECTS

Cassopia Hotel Website

- 📌 **Description:** Cassopia hotel reservation system Real-time room availability using React.js, Bootstrap, Node.js.
- 🎯 **Role:** Frontend Developer (UI implementation, responsive design, booking flow).
- ⚒ **Tech Stack:** `React` `Next.js` `TypeScript` `Node.js` `Express` `MongoDB` `GraphQL` `Vercel`
- 🔗 **GitHub:** https://github.com/Amde-88/Cassopia-hotel.git
- 🔗 **Link:** Cassopia-hotel

Dynamic Portfolio

- 📌 **Description:** Full-stack developer crafting seamless web experiences with React, Node.js, MongoDB and modern APIs.
- 🎯 **Role:** Full-Stack Developer | React & Node.js | Building Scalable Web Solutions with Clean Code.
- ⚒ **Tech Stack:** `React` `Next.js` `TypeScript` `Node.js` `Express` `MongoDB` `GraphQL` `Vercel`
- 🔗 **GitHub:** https://github.com/Amde-88/Cassopia-hotel.git
- 🔗 **Link:** Dynamic-portfolio

Todo APP

- 📌 **Description:** Developed a **real-time Todo application** Designed APIs for CRUD operations (Read, Update, Delete tasks).
- 🎯 **Role:** Streamline Task Management | React & Node.js | Building Efficient Web Apps with Modern Tech.
- ⚒ **Tech Stack:** `React` `Next.js` `TypeScript` `Node.js` `Express` `MongoDB` `GraphQL` `Vercel`
- 🔗 **GitHub:** https://github.com/Amde-88/Todo-App
- 🔗 **Link:** Todo-App

💼 WORK EXPERIENCE

Frontend & Full-Stack Developer | Solution Development

- Designed and deployed production-ready web apps (Hotel Booking System, Dynamic Portfolio, Todo-APP).
- full development lifecycle from database design (MongoDB) to secure backend (Node.js/Express).
- Built web apps with React/Next.js Automated deploy via CI/CD (Vercel/AWS) demonstrating full-stack capabilities.
